### High-quality workspace solutions

BakkerElkhuizen specialises in developing high-end, ergonomic hard- and software solutions that contribute to the physical and mental wellbeing of computer users. Our innovative solutions encourage employees to achieve better wellness at work, become more productive, adopt healthy postures and alternate between them to increase movement. Our hard- and software solutions are distributed via an extensive network of national and international resellers and distributors.

### WORK & MOVE™ Software

Healthy and efficient working practices do not always go hand in hand. BakkerElkhuizen offers a unique proposition for this challenge, comprising an optimal mix of ergonomic hardware and smart WORK & MOVE® software. Because we believe passionately in combining health, comfort and performance. The WORK & MOVE® software includes four tools that structurally improve the working comfort and efficiency of each individual knowledge worker and of the organisation as a whole.

- ① WORK & MOVE™ Software
- ② Sit-Stand Desks
- ③ Notebook Stands
- ④ Tablet holders
- ⑤ Keyboards
- ⑥ Ergonomic mice
- ⑦ Mouse Pads & Wrist Rests
- ⑧ Document Holders
- ⑨ Monitor Stands
- ⑩ Monitor Arms
- ⑪ CPU Holders
- ⑫ Footrests
- ⑬ Notebook Cases

We believe passionately in combining health, comfort and performance. WORK & MOVE is software that demonstrably and structurally improve the working comfort and efficiency of each individual knowledge worker and of the organisation as a whole.

WORK & MOVE is your personal coach, providing enough alternation between digital screen work and mental and physical movement. Insight and feedback are given on your computer behaviour.

## BakkerElkhuizen WORK & MOVE Analytics

**Real time:** WORK & MOVE Analytics provides insight into and overview of groups and departments  
**Trends:** analyse trends, developments and correlations across days, weeks, months and years.  
**Policy:** concretely substantiate your Health & Safety policy with the help of objective data.  
**SAAS:** WORK & MOVE Analytics is a Software as a Service (SAAS) solution. Setting it up is easy and quick.  
**Privacy:** the software meets all GDPR requirements with regard to privacy protection.

Product code: BNEWMANA

## BakkerElkhuizen AltMOUSE

**Personalized learning:** live coaching on only the shortcuts relevant to the individual.

**Work smarter:** reducing slow and pain causing mouse use by over 50%

**Training on the job:** no downtime for learning relevant shortcuts

**Feedback:** positive feedback and reports to encourage behavior change.

**Efficiency gains:** shortcuts are on average 30% faster than using a mouse.

**Healthier:** shortcuts spread the work out over 10 fingers, instead of using a mouse with one hand.

## Ticken

**Interactive:** direct feedback on typing errors for continuous improvement.

**E-learning:** online access enables practice anywhere, anytime.

**Feedback:** personalized advice for keys that need extra attention.

**Attitude:** being able to touch type has a positive effect on work performance.

**Inclusive:** globally recognized typing exams included.

**Ergonomics:** touch typists adopt better postures as they look up at the screen.

Product code: BNEWMTICKEN

[Watch video online](#)

## Ergonomic mice

Unnatural postures which occur using a standard mouse increase the risk of discomfort in wrists and forearms. Ergonomic mice reduce muscle tension in comparison with standard flat mouse devices and are much more comfortable. There are many options and the most suitable depends on the type of work carried out, existing injuries and personal preference.

### Evoluent D Wired

**Design:** the Evoluent D has a luxurious and smooth design.  
**Fingers:** this mouse is designed to ensure your fingers are in the perfect position.  
**Buttons:** five easy-to-reach buttons and a clickable scroll wheel.  
**Ergonomic:** improves the posture of your arm and wrist with the vertical grip.  
**Easy:** easily change the cursor speed to suit your preference.  
**Acclimatization time:** very short due to the natural handshake position.

Dimensions: 86 x 110 x 78 mm (W x D x H)

## Keyboards

Compact keyboards bring the mouse within comfortable reach, thereby reducing stress on the arms and shoulders. Using a compact keyboard is more comfortable than using standard keyboards (Van Lingen et al., 2003).

Around 90% of users never or rarely use the numeric part of the keyboard (Cakir, 2008) so for the most part it is not required. When the numeric pad is used it should be possible to place it for left or right handed use.

### UltraBoard 960 Compact Standard

**Narrower:** despite the fact that this keyboard includes a numerical keypad, it is still considerably narrower than a "normal" keyboard.

**Concave keys:** the surface of the keys is designed to automatically guide your fingers to their center.

**Size:** because of its compact size, this keyboard will easily fit in your backpack, so you can take it with you wherever you go.

**Color:** the UltraBoard 960 has white keys with dark letters.

**USB hub:** two easy-to-reach USB ports.

**Ideal:** for employees with a permanent workstation who want to create more space on their desk.

Dimensions: 363 x 147 x 19 mm (W x D x H)  
Weight: 628 gr  
Product code: BNEU960SCUS (Multiple versions)

[Watch product online](#)

[Watch video online](#)

### BakkerElkhuizen UltraBoard 950

**Compact:** the keyboard is thinner, narrower and shallower than the S-Board 840.

**Ergonomic:** its compact shape enables you to adopt a better working posture, with fewer lower arm complaints as a result.

**Modern:** the UltraBoard 950 has a modern and stylish design.

**Keys:** a light keystroke, dark letters on a light background and less noise when typing.

Dimensions: 285 x 147 x 19 mm (W x D x H)  
Weight: 455 gr  
Product code: BNEU950US (Multiple versions)

## BakkerElkhuizen UltraBoard 950 Wireless

**Compact:** The keyboard is thinner and less wide and deep than its predecessor, the UltraBoard 940.

**Ergonomic:** Because of its compact form you will adopt a better work posture, resulting in fewer forearm problems.

**Modern:** The UltraBoard 950 Wireless has a modern and stylish design.

**Keys:** A light key touch, dark letters on a light background, and less noise while typing.

Dimensions: 285 x 147 x 19 mm (W x D x H)  
Weight: 430 gr  
Product code: BNEU950WUS (Multiple versions)

[Watch product online](#)

## UltraBoard 955 Numeric

**Suitable:** the UltraBoard 955 Numerical is the ideal keyboard for you if you regularly have to enter data and often use spreadsheets and financial software.

**Alternate:** using a stand-alone numerical keyboard allows you to switch between left- and right-handed data entry, which increases both your comfort and your productivity as you work.

**Quality:** the laptop-style keystroke (with a scissors mechanism instead of a membrane system) reduces the volume of your typing and offers better sound absorption.

**A compact keyboard does not feature a numerical keypad. This allows users to position their mouse closer to their keyboard. Research shows that 90% of all keyboard users rarely or never use their numerical keypad.**

**A compact keyboard is more comfortable to use, because it reduces the distance to your mouse (Cook C, et al., 1998). This limits the strain on the user's lower arms and shoulder.**

**Dark letters on a clear background are easier to read (ISO 9241) and contribute to an increased productivity (Snyder, 1990).**

**Optimal layout:** full size keys, extra wide space-bar and easy access arrow keys.

Dimensions: 87 x 147 x 19 mm (W x D x H)

Weight: 134 gr

**Numeric:** optional numeric pad available.

**Ergonomic:** responsive typing feeling for touch typists.

**Product code:** BNEU955NUM

## Laptop Stands

Notebook stands raise the screen of a laptop to a comfortable viewing height. This places much less stress on the neck enabling more comfortable work.

BakkerElkhuizen notebook stands that have an inbuilt document holder have been independently tested. Our stands increase productivity by 17%, reduce stress on the neck by 32% and result in a 21% increase in comfort (Lindblad et al., 2004).

### ProStand

**Design:** perfectly matches your MacBook. Because it only weighs 125 grams, you will forget you even have it with you.  
**Adjustable:** easily adjustable with three height settings to choose from.  
**Ideal:** with one simple move, you can attach the laptop stand to your MacBook.  
**Protection:** protects your MacBook against minor bumps and damage.  
**Workspace:** easily use your MacBook as a second screen.  
**Functional:** ports and ventilation outlets are not blocked.

Dimensions: 310 x 219 x 15 mm (W x D x H)

## Document Holders

Document holders bring keyboard, document and screen into a straight line for comfortable working. When documents are placed to the side this causes unnecessary strain on the neck.

Using an in-line document to bring everything into a straight line shortens viewing distances, increasing productivity.

© BakkerElkhuizen

### BakkerElkhuizen FlexDesk 640

**Multifunctional:** the FlexDesk is a 2-in-1 stand and document holder.  
**Top quality:** matte worktop, smoothly gliding rails, pen container, solid (acrylate thickness 5 mm).  
**Efficient:** because the viewing distances are smaller between document, screen and keyboard.  
**Adjustable height:** (110-180 mm) which gives you a good connection with the screen.  
**Faster:** and more efficient alternate between writing and computer work.  
**Convenient:** has storage space for a full-size keyboard, space under the front is 55mm.

## Monitor Stands

The top of a monitor should be roughly in line with users eyes. This optimum position increases comfort and reduces the risk of injury. Productivity also goes up by 10% compared with an incorrectly positioned screen (Sommerich et al., 1998).

To reduce eye strain and ensure easy long term viewing of the screen it should be placed roughly an arms length away when a user is sat correctly.

### BakkerElkhuizen Q-riser 50

**Design:** Dutch design & Made in Holland. A high-quality appearance.  
**Ergonomic:** this stand enables you to obtain the correct working height easily.  
**Cable management:** your monitor cord is neatly stowed.

## BakkerElkhuizen Q-deskmanager 150

**5 height positions:** 9-10-12-14-16 cm.

**Smart:** storage space underneath monitor.

**Cable management:** integrated cableholder.

**Extra:** holder for PDA, mobile phone, i-pod or calculator.

**Complies:** with legal requirements for healthy desktop computing.

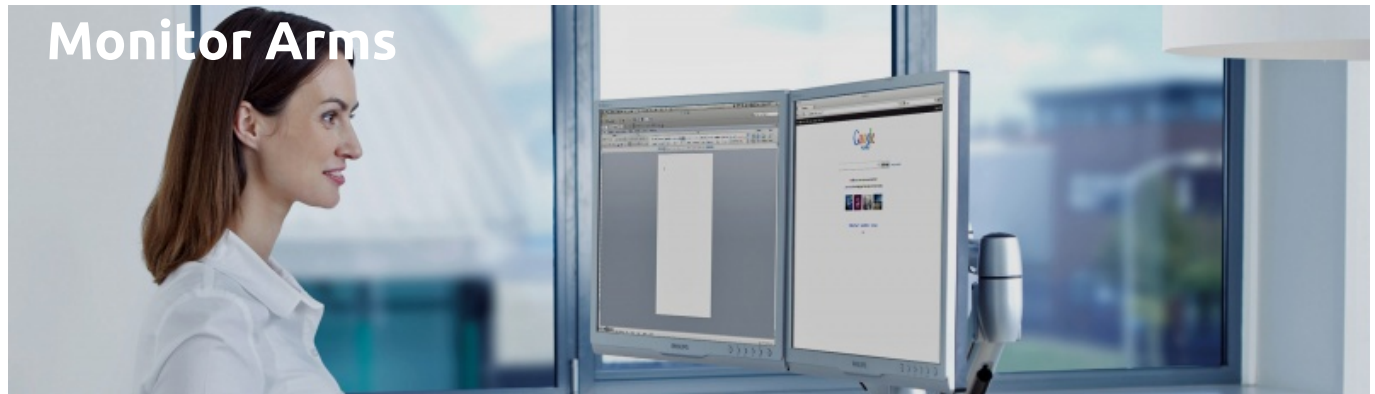

**Suitable:** for flatscreen monitors.

Dimensions: 310 x 330 x 90 mm (W x D x H)

Weight: 1.8 kg

Product code: BNEQDM150

[Watch product online](#)

The top of a monitor should be roughly in line with users eyes. This optimum position increases comfort and reduces the risk of injury. Productivity also goes up by 10% compared with an incorrectly positioned screen (Sommerich et al., 1998).

A monitor arm allows the screen to be easily positioned for different tasks and when the user moves position for comfort. Another benefit of a monitor arm is that more space is created on the desk.

## Space-arm Single

**Ergonomic:** height range 33-62 cm (top of 19-inch screen), depth range 25-58 cm.

**Modular:** can be extended from single to double or triple screen.

**Gas spring technology:** quickly and easily adjustable by any user. Ideal for flex workspaces.

**Universal:** VESA 75/100, clamp range up to 100 mm, grommet (eyelet) up to 60 mm.

**Load-bearing capacity:** 104 kg, 2.25-7.5 kg, 7-14 kg (stronger gas spring on request).

**Practical:** 1-8 monitors on a single hub (or base).

Dimensions: 521 x 65 x 464 mm (W x D x H)

Weight: 3.3 kg

## Sit-Stand Desks

Switching between sitting and standing while working creates more variation in posture throughout the day. This reduces discomfort in the back, neck and shoulders compared with sitting at a regular desk (Choi, 2010; Rabbit et al, 2008; Hedge and Ray, 2004; Karlqvist, 1998).

The effect of alternating between standing and sitting postures results in concentration levels remaining higher for longer (Ebara, et al., 2008). Work performance and the quality of output also improves. (Garrett et al, 2016; Choi, 2010; Hedge and Ray, 2004).

## InnoDesk

**Easy:** no tools required for assembly thanks to our patented Twist & Lock  system.  
**Automatic:** height-adjustable using the WORK & MOVE (SitStandCOACH en PitStops) software supplied or the on table controls.  
**Design:** award winning modern European design.  
**Assembly time:** under 5 minutes.  
**Height:** 25.5 - 52.75 inches.

[Watch video online](#)

Footrests are essential for people who can not sit with their feet flat on the floor when the rest of their workstation has been set up to support a good posture. This often happens with fixed height desks.

The adjustable range, the angle and a wear-resistant surface are important.

© BakkerElkhuizen

## Basic 950

**Ergonomic:** height adjustable (30-195 mm) and adjustable angle provides stable support for the feet.

Weight: 6.5 kg  
Product code: BNEFFSL

[Watch product online](#)

## CPU Holders

A desktop PC placed on a desk under the monitor takes up a lot of space. The alternative is often to place the PC under the desk on the ground. This increases the risk of dust getting into the PC, makes cleaning more difficult and crucially; reduces the space to move legs and feet under the desk.

A CPU holder enables the PC to be hung under the desktop keeping the PC off the floor and creating space.

© BakkerElkhuizen

### Fix

**Space-saving:** creates more desk space.

**Protection:** keeping the CPU off the floor, preventing damage due to cleaning or stray feet.

**Easily accessible:** accessing power on/off switches, CDs and USB ports.

**Clean:** away from dust and easier for vacuuming around the desk.

**Adjustment range:** max. radius of 150 cm.

## Laptop bags

Experts recommend not carrying loads heavier than 8 to 14 lbs by hand. The variation depending on distance, frequency and gender (Mital et al., 1993).

A bag containing a laptop and other content regularly weighs in excess of this recommended maximum. A trolley or rucksack is suggested as a safer alternative to avoid discomfort and injury.

### TCG717 rolling laptop bag

**Versatile:** suitable to transport both your personal and your business items.  
**Practical:** multiple compartments to properly store your belongings separately.

**Large:** this case fits laptops up to 17.3".

**Materials:** soft, sturdy materials and a solid telescope arm.

**Ergonomic:** the telescope arm helps you easily transport the laptop and accessories.

## Mouse Pads & Wrist Rests

Wrist rests provide a guide that helps keep the arm, wrist and hands straight. This prevents over extension of the wrist which occurs when the wrist bends beyond neutral. Holding the wrist in this position for an extended period, which happens when typing and using the mouse, is a cause of discomfort and injury. Keeping the wrist off of the cold, hard desk surface also has benefit.

### BakkerElkhuizen The Egg Ergo Mouse Pad

**Unique design:** the Egg-form follows the natural mousing pattern.  
**Hygienic:** antibacterial surface.  
**Comfortable:** thermal-insulating top surface keeps your hand away from the cold, hard desk surface.  
**Productive:** smooth surface provides accurate mouse control.  
**Eco:** recycled material.

Dimensions: 230 x 2 x 300 mm (W x D x H)  
Weight: 60 gr  
Product code: BNEEMP

## Forearm Support

**Ergonomic:** supports the arms and helps reduce muscular strain in the neck and shoulders.  
**Symmetrical:** extra wide arm support so that the arms are supported both during typing and when using a mouse.  
**Simple mounting:** bracket on the desk top (drilling not required) and two adjusting screws so that the support can be adjusted to the thickness of the desk top (between 10 and 35 mm).

Dimensions: 560 x 220 x 25 mm (W x D x H)  
Weight: 2.3 kg  
Product code: BNEUASS

WORK & MOVE Software | Ergonomic mice | Keyboards | Laptop Stands | Tablet holders | Document Holders | Monitor Stands  
Monitor Arms | Sit-Stand Desks | Footrests | CPU Holders | Acoustic solutions | Laptop bags | Mouse Pads & Wrist Rests | Privacy Filters

Privacy filters protect laptops and mobile devices against others looking at your screen by blocking the image from everyone except the user of the device. This means that mobile employees can work safely while travelling and in public places. This reduces the risk of expensive data breaches and can help organizations comply with data protection standards such as ISO27001.

## 3M Privacy Filter Gold

**Clarity:** gives 25% more clarity than the standard black filter.

**Reversible:** gold or shiny black.

**Response:** improved touch response with a soft feel.

**Resolution:** perfect for screens with a high resolution and more pixels.

**Unique:** thinnest filter in the range and the unique shiny surface radiates a golden color for more privacy.

**Protection:** protects your screen and easy to clean.

Dimensions: 194 x 345 x 1 mm (W x D x H)

Weight: 48 gr

Product code: BNEPFG1560 (Multiple versions)
