DIMENSIONS AND ABBREVIATIONS

All dimensions are shown in metric. Imperial conversions are for reference only and are approximate.

The following abbreviations are used:

h	height		Colour
w	width		Multi-screen
d	depth		Screen weight
ø	diameter		LED Lighting
M	metric		USB
			Mains socket

PRODUCT COLOUR

Please note that not all product lines are available in all colour variations. Please check the relevant product page in this pricelist for ex-stock colour availability. Some products may be available in additional colours to special order but lead time and MOQ (minimum order quantity) conditions may apply. Please contact your sales representative for more details.

Please note that the shade of silver colour may vary between individual product lines.

Whilst we aim to maintain high standards of consistency of finish on all of our products, there may be some slight colour variation due to standard manufacturing tolerances.

WEIGHTS

Please note all weights given in this price list are NET (i.e. packaging weight is NOT included)

WHAT WORKER STYLE ARE YOU?

WORKING PRACTICES ARE CHANGING ALL THE TIME. PEOPLE OFTEN WORK IN A NUMBER OF DIFFERENT LOCATIONS WITH AN ASSORTMENT OF WORK TOOLS.

This creates a variety of worker styles, each with unique technology requirements required to perform their roles. It is our goal to ensure that we cater for these different worker styles by providing a range of ergonomic tools designed around their needs.

HYBRID WORKER

A hybrid worker works in the office four or five days per week, but only for three to five hours each day.

They have a need to be mobile around the workplace attending meetings or collaborating with colleagues. They may not have an assigned workspace so have a need to quickly setup their workspace to their requirements each day.

RECOMMENDED PRODUCTS

Ollin	17
Flo	18
Lima	23
Wishbone	24
CBS Laptop Stand	36
Tabetha	36

MOBILE WORKER

The mobile worker is typically on the move, working in one location just one to three days each week for just a few hours a day.

Often the mobile worker will not have an assigned workstation so they need their work tools to be able to ergonomically adjust to their individual requirements quickly and easily in multiple locations.

RECOMMENDED PRODUCTS

Ollin with Laptop Mount	21
Flo with Laptop Mount	21
Flo Dual with Laptop Mount	21
CBS Laptop Stand	36
Tabetha	36

FIXED WORKER

Works at an assigned desk more than six hours a day for four to five days each week.

The fixed worker benefits from having their ergonomic accessories permanently set to their individual requirements. And by ensuring that they are also adjustable, they can be altered throughout the day to compensate for light conditions and different task requirements.

RECOMMENDED PRODUCTS

Ollin	17
Flo	18
Lima	23
Wishbone	24
Tabetha	36

MULTI-SCREEN WORKER

A high density worker works with a large amount of information in front of them.

Their requirements are focused around scaling the system to specific needs and the data that they are viewing. This can range from a trading desk to a control room. They have the need to change the number of screens, screen position, number of tiers and screen orientation to enable them to do their job to the best of their ability.

WORKSTATION ORGANISATION

OUR RANGE OF WORKSTATION ORGANISATION PRODUCTS HELPS YOU CREATE A MORE EFFICIENT AND PRODUCTIVE WORKING ENVIRONMENT WHILST MAXIMISING DESK SPACE.

TABETHA

0.8kg 1.8LB | 7" - 12.9" | WHITE

TABETHA IS AN INNOVATIVE DESKTOP MOUNT FOR 7" TO 12.9" TABLETS.

- Mounts a tablet quickly and securely for comfortable and convenient desktop use.
- Adjustable to hold a range of tablet sizes from 7" to 12.9".
- Softpads protect the tablet and hold it securely.

- Twist-lock telescopic column is height adjustable.
- Portrait-to-landscape rotation
- Cable management clip holds power connector conveniently in position as required.

SLINKY

BLACK / TRANSLUCENT

HIGH CAPACITY CABLE MANAGEMENT SYSTEM

- Weighted, metal base ensures stability of unit
- Four compartments allows segregation of power, data and voice cables
- Available in two lengths

- Easy to remove when reconfiguring areas
- Large capacity – can comfortably hold 20mm diameter flexible conduit

LOOP

20KG 44lb   **BLACK**

QUICK AND SIMPLE TO INSTALL A STRONG YET LIGHTWEIGHT SOLUTION FOR CPU STORAGE

- Simple, light and effective CPU holder
- With a minimalist black strap, Loop integrates seamlessly with the desk
- CPU size range:
  Height 240-500mm
  Width 80-225mm

- Fully adjustable
- Minimum materials used, provides lightweight solution for shipping and storage
- Easy to install, CPU is supported by webbing which is easily tightened by a ratchet mechanism

CUSTOM DESIGN SOLUTIONS

AS AWARD WINNING DESIGNERS AND MANUFACTURERS OF ERGONOMIC IT AND AV SOLUTIONS WE HAVE THE SKILLS, EXPERIENCE AND INITIATIVE TO PROVIDE CUSTOM SOLUTIONS TO OUR CLIENTS WHEN REQUIRED.

At CBS we believe passionately in design, focusing on creating space and comfort through the imaginative relocation of IT and audio visual equipment. In the vast majority of cases our standard product fixings already fit our clients' specifications, but on the rare occasions when exceptions occur we have the ability to customise our products to meet our clients' requirements.

In some cases our Custom Solutions can become part of the evolution of our products, adapting and innovating to meet marketplace developments.

Typically we provide Custom Solutions for our Desk Clamp Fixings for attaching arms to the desk, Under Desk Fixings for attaching CPU units, and as additional attachments to our monitor arms, such as a laptop stand.

Our in-house design and account management teams work closely with the client to ensure that our Custom Solution adheres to the specification.

HOW WE WORK WITH A CLIENT:

INITIAL MEETING
To begin with all requirements are evaluated by a CBS account manager who will need to provide approval prior to a first sample being ordered.

FEASIBILITY
To enable the custom solution to be designed a 3D CAD file of the furniture, or in some cases a sample, is required. Typically a Custom Solution requires a minimum order quantity of 10 units - excluding the first sample.

CONCEPT DESIGN, DETAIL DEVELOPMENT AND PRODUCTION
An account manager will then pass on information to our design team who will typically provide:

- Concept images
  (2 - 3 working days)

- First evaluation sample
  (7 - 10 working days from concept approval, excluding shipping time)

- Production samples/order fulfilment
 *(3 - 4 weeks from sample approval, excluding shipping time)*
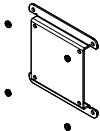

*A RANGE OF COMPONENTS
AND SERVICE PARTS, PERFECT
FOR REPLACING THAT MISSING
VESA PLATE, HIGH LOAD
LOCATION RING OR CABLE CLIP.*

OUR STORY

*COLEBROOK BOSSON
SAUNDERS HAS BEEN
DRAWING ON THE VARIED
AND COMPLEMENTARY SKILLS
OF ITS FOUNDERS MARTYN
COLEBROOK, PETER BOSSON
AND BRENDA SAUNDERS SINCE
ITS INCEPTION IN 1990.*

Their blend of architecture, product design and innovation, and furniture design created unique solutions that facilitate interaction between technology and furniture in the workplace. This distinctive approach redefined workplace ergonomics, and still influences how people sit and work with computers today.

Peter and Brenda were experienced in designing interiors for financial clients who 'loaded' employees' desks with tech and IT equipment. Through assessing these set ups, they realised that the user's needs were in conflict with the technology they were using. A month-long research project by Peter Bosson and Olivetti followed, which examined the relationship between users and their technology.
In 1985 this research resulted in the development of Gemini – the world's first monitor support – and new wire management products and CPU supports.

When joined by Martyn in the early 1990's the designs pioneered by Peter and Brenda, along with their contacts in the financial sector, demonstrated that there was potential to start a business designing and manufacturing ergonomic technology support tools.

Colebrook Bosson Saunders forged new ground and pioneered workplace ergonomics. And when the flat screen monitor was invented, ten years after Colebrook Bosson Saunders' initial offering, the market really took off. Proving that inspiration can come from anywhere, it was a windsurf board that lead to the idea for supporting flat screen monitors. While on his board, Peter noticed that the mast and sail were supported by a rubber 'O' ring where mast and board met. From this realisation he designed Wishbone, the first ever flat screen monitor arm on the market. This lateral approach to design has continued to enable Colebrook Bosson Saunders to create market firsts and award-winning designs which help drive human performance and improve user wellbeing.

Colebrook Bosson Saunders. Innovate. Create. Connect.

We strive for new ways to enhance user experience through the seamless connection of people and technology.
