www.pj-production.dk

We are producing office accessory products to improve productivity and life-quality for those who spend a large part of their lifespan at the office.

About PJ Production // PJ Production was established in year 1997, and has since the beginning designed, developed, and produced office accessory products for the modern working environment. We are an international company with big ambitions ready to optimize our customers' business, regardless of the size of the tasks. We truly believe that great service, consultancy, and reliable delivery are the key towards success. We determinedly take our collaborators' demands very seriously via reciprocal respect, ongoing dialogue, and quality-oriented solutions. And this exact combination supports our livelihood on a market with quality-consciously collaborators.

Besides the transparent collaboration, we make a virtue out of delivering high-quality products to our clients that fulfill the agreed standards and specifications. These high-quality standards and specifications are mandatory as we use internal quality-control. All inbound and outbound products are randomly controlled to ensure equal quality every time. Thereby, you can always expect to receive quality products from PJ Production – standard products as well as specially produced products.

BAMBOO PEN TRAY

X-SMALL & LARGE

Sustainability, durability, and versatility // These bamboo pen trays are a reinterpretation of our existing bamboo collection. The philosophy has been to create sustainable designs with the essential characteristics of the beauty of nature, and the authenticity thereof. With nature as inspiration combined with an ongoing environmentally awareness, bamboo became an attractive choice, since the material is the most environmentally-friendly resource to sustainability, durability, and versatility. Bamboo is widely perceived as an attractive alternative compared to other materials used in our existing portfolio due to its green growth, sustainable harvesting, and wood-like properties.

The design has taken functionality into consideration, since wires and cables discretely can be hidden through the two cut-outs in the back of the drawer. Additionally, unaffected by the version, the measurements of the designs have beneficial sizes, which makes them recommendable for the majority of all desks, - including depth 80 tables. The bamboo collection consists of two different sizes, whereas the large version is available in two different versions, - one without an insert and one with a color-matching insert. The entire collection is available in natural top coat and black stain.

PEN TRAY

NARROWED & WIDEN MODELS

Effective storage // This pen tray collection is for the client looking for a drawer with an optimal overview combined with the compartmentalized organization. The pen trays must be mounted directly underneath the desktop, which, in combination with the uninhibited size, creates excellent space in the working environment.

The collection consists of two different versions, - a narrowed model and a widen model. The two versions can either be delivered with or without a lock, where all drawers are delivered with a compartmentalized plastic insert. Currently, the pen trays can be delivered in either black, aluminium, or white, as standard, but if other customized colors preferred, you are more than welcome to contact us.

LOCKABLE TABLET TRAY

NARROWED & WIDEN MODELS

Safety and security first // Whether if it is the storage of tablets/iPads or just smaller objects, then this drawer is an excellent choice. The drawer protects against simple theft since the tablet tray is delivered with lock and two keys. The lockable tablet tray can likewise be delivered with a high-quality German locking system including a master key if that should be preferable. Furthermore, the lockable tablet tray comes with a gummi matte in order to keep the stored belongings secured.

LAPTOP TRAY ATHENE

Modernizing, organizing, and optimizing // The working stations are getting smaller concurrently with an improved for storage removed from the surface of the desktops. While this development seems to continue, PJ Production has designed and developed a modernized version of our well-known Laptop Tray 2014 called Laptop Tray Athene. Laptop Tray Athene embraces the tendency with the smaller working environment, which makes the drawer recommendable for the majority of all desktops, - depth 80 tables included, due to the narrowed depth of 316 mm. The height and width are more or less comparable with Laptop Tray 2014 to ensure maximum capability in terms of storage of drawer blocks, a laptop, pencils, pens, personal belongings, among other things. The design of Laptop Tray Athene has taken overheated belongings into consideration, which has been solved with vent-holes in the back of the drawer. If even more vent is required, the majority of the back can be removed due to the perforations.
Laptop Tray Athene is delivered with lock, as standard, whereas compartmentalized organization can be yours by the acquisition of a colour-matching insert. Furthermore, the drawer can be upgraded with a bamboo front to support the exclusivity. Yet it is noteworthy that this bamboo front is mainly project-oriented, - do not hesitate to contact us to hear more about the different possibilities.

SLIMTRAY

SMALL & LARGE

Simple, discreet, and functional // Our well-known Slimtray collection has a discreet look where no compromises have been taking regarding functionality. The collection consists of two attractive sizes, where both are available in two versions and three colors. Unaffected by the above-mentioned features, all versions are delivered with a plastic insert that easily can be removed if required. The design of the collection is relatively equal uninfluenced by the versions, where the only factor differs is the width, as the large has a width of 871 mm, whereas the small has a width of 426 mm. A factor similar for all productions is the discreet front of 32 mm, which gives a simple, elegant, and light expression at the workplace. Furthermore, the depth is likewise equal for all drawers, - 260mm, which makes the drawers recommendable for the majority of all desktops. Both sizes are available in two versions, - one with lock and one with a color-matching plastic cap. The plastic cap can easily be swapped with a lock afterward if this was not prioritized at first.

2012 PEN

For the narrowed workplaces // One of the most recommendable drawers for narrowed workplaces can always be found in the assortment of PJ Production, and this 2012 Pen is definitely a great example of this. The drawers do not have any disturbing elements due to the minimized visibility combined with the size. These exact features make the drawer beneficial for smaller and narrowed workplaces as long as the drawer is not obstructed bt the table frame due to the drawer's relatively large depth on 473 mm. 2012 Pen is available in three different colors in order to keep the discreteness. Unaffected by the color, the drawer is always delivered with a gummi matte, which can be removed if wanted.

NEWLINE

A cheaper alternative // The Newline CPU-holder is a newer version of our existing CPU-holder 2001 collection. Thinner wall thickness and different production methods make the Newline a cheaper alternative, but definitely not a worse option! No compromises in terms of quality and design have been considered since PJ Production wants to ensure a high standard of products on the market.

Newline has two different installation opportunities: either by installing directly underneath the desktop or with the swivel mount. The last solution is an optimal choice if the table frame has a disrupting placement. The swivel mount is also recommendable if the USBs are placed on the top at the computer.

FASTDOCK

A stable solution // If looking for a vertically mounted solution for a laptop and a docking station, then this FastDock is an excellent choice. The system must be directly installed underneath the desktop, simultaneously placing the personal laptop and docking station closer to the possessor. The level of clean desk caused by the placement is increased since the laptop and docking station is removed from the desktop. Lastly, the laptop and docking station are secured responsibly due to the enclosed safety strap.

SLIMDOCK

Everything in one solution // SlimDock is a stable and functional solution for the storage of a laptop and a docking station, respectively. Besides the functionality, the SlimDock has a drawer for extra storage for writing materials, mobile phones, personal belongings, among other smaller objects, which is removed from the desktop automatically.
SlimDock can easily be installed underneath the desktop, also when the desktop has a hardly placed table frame due to the distance bracket as an accessory. The organization possibilities can likewise be upgraded with a size-fitted tray for the drawer. This tray has a passage for cables, which makes it possible to install a charger for a stored mobile phone.

LAPTOP HOLDER

HORIZONTAL: EXTRA SMALL, SMALL, MEDIUM & LARGE

An open solution for laptop and docking station // This horizontal laptop holder from PJ Production is an affordable combination of a drawer and a CPU-holder. The collection consists of four different sizes, which must be installed directly underneath the desktop in order to have the laptop and docking station close by.

The advantage of these horizontal laptop holders is that they can be installed on the majority of all desktops – included desktops with a hardly placed table frame. Furthermore, the standard sizes can easily be changed in relation to a project-oriented assignment depending on the specific demands and needs. The four horizontal laptop holders have setting extraction as standard, which means that they can be extracted 370 mm. Additionally, all four sizes have height adjustment on 70-140 mm. and are all available in black, aluminium, and white, respectively.

FUTURE FLEX

FOR ONE, TWO, OR THREE MONITORS

Embrace the clean desk policy // Tailoring the working space to be ergonomically friendly is essential in order to avoid work-related injuries. This issue is exactly what our new monitor system called Future Flex would like to solve by comfortability and availability. Future Flex has full 360 degrees rotation, can be tilted both directions, and manual height adjustment. This combination creates a more productive and comfortable working position.

Future Flex consists of an elegant monitor pole in black, a mount, and the correspondingly amount of extension arms and VESA mounts. The system creates flexibility and fully utilization since the monitor pole is available in two versions: a centered through-desk mount or a centered desk clamp, depending on the preferences. Lastly, Future Flex embraces the clean desk policy, as the monitor pole has incorporated storage to reduce visible cables and wires behind the monitors and/or along the edge of the desktop.

MONITORARM

FOR ONE OR TWO MONITORS

An ergonomic correctly solution // This Monitorarm from PJ Production can be operated via gas springs, which provides a smooth height adjustment optimizing the workstation ergonomically. The system can either be bought for one monitor or two monitors, which both are produced in black powder-coated aluminium. Furthermore, the monitor system is delivered with two installation options, - desk clamp and through desk mount, both options included as standard.

The monitor system benefits ergonomic, since the monitors have full 360 degrees rotation and can be tilted 85 degrees up and 15 degrees down. Additionally, the cables and wires from the installed monitor(s) can easily be fitted to the Monitorarm with the included cable clamp.

MONITOR POLE

FOR ONE OR TWO MONITORS

Let the client determine the final design // Looking for a monitor system that optimizes the space on the desktop – look no more. This Monitor Pole is recommendable for that purpose since the extension arms can be installed on both sides of the aluminium pole, and thereby preferable for the smaller working environments where space is minimized.

Cables and wires are hidden from sight within the 30 cm. aluminium pole, which creates a clean desk expression in the working environment. Currently, the monitor pole is available at the height of 30 cm., but this can easily be adjusted depending on the specific demands. The aluminium pole can likewise be combined with monitor profiles to create a monitor rack for a self-chosen amount of monitors. Either way, you are more than welcome to contact us for a custom-made solution, because at PJ Production anything is possible, - and is it only the client that determines the final design.

EXTENSION ARMS

ADD-ON

If you would like to upgrade your monitor system // The monitor systems from PJ Production are built upon extension arms, which support a personalized working environment. If investing in a Monitor Pole one extension arm or a Future Flex with two extension arms, then these can always be upgraded with the preferred amount of extension arms.

When investing in an extension arm, you get the possibility of installing an extra monitor in the working environment as an improvement. However, be aware that the extension arm is excluding VESA mount, which can be found on the following page.

VESA

ADD-ON

A VESA mount to the universal monitor // Monitor systems from PJ Production do always include a corresponding amount of VESA mounts. The monitor system can at any time be upgraded, which means that the amount of VESA mounts has to be upgraded as well. Our VESA mounts can be used til all monitors due to the measurements of both 75 x 75 and 100 x 100, which are the standard distances between the screw-holes. Furthermore, the VESA mount can be rotated, allowing easy positioning and safety in terms of the tilting adjustment, which provides the user the most ergonomically position.

GAIA CABLE TRAYS

MODULE & FIXED LENGTH

Create connectedness with the desk // There is hardly anything in the world that is more unpleasant than cables and wires in different colors and sizes along the edges of the desk. Additionally, these visible cables affect the indoor climate, since the dust easily gets caught in the mess, where the vacuum cleaner cannot get access to.

Fortunately, PJ Production seeks to overcome the issue with visible cables and wires with a simple, attractive, and professionally correct solution. We have designed this new cable tray line with two designate sub-categories: module cable trays and fixed-length cable trays.

The module cable tray is 47 cm., and can be connected together with the enclosed connectors depending on the demands. The cable tray is also available in two fixed lengths, - 115 cm. and 147cm., if this is preferred instead of the module version.

CABLE TRAY 2006

FIXED

A fixed, spacious solution // This cable tray is recommendable for working environments with a clean policy, since the wires and cables can be stored within the cable tray. The fixed and spacious cable tray is fitted underneath the desktop in order to minimize the visibility of the wires and cables. Additionally, the cable tie fastening holes can likewise be used to keep the wires and cable in order.

The fixed cable tray collection consists of four different sizes, which individually have a different amount of cable tie fastening holes. The shortest cable tray with a measurement of 40 cm. and has not centred fastening holes. The next size measuring 74 cm. has a single centred cable tie fastening hole. The two middle sizes, - with the measurements on 90 cm. and 115 cm., respectively, both have double centred cable tie fastening holes, whereas the longest cable tray measuring 147 cm. has three centred holes. Either way, all lengths can be delivered in three colours, - black, aluminum, or white.

CABLE TRAY

OPENABLE

A cable tray easy to install // It has never been easier to install wires and cables than with this openable cable tray from PJ Production. The cable tray can easily be tipped to increase the availability of the cables and wires stored. Furthermore, the cleaning staff has full access to dust occurring in the cable tray, which can be done by one person due to the simple functionality.
The cable tray is available in three different lengths, - 74 cm., 125 cm., and 147 cm., which gives you the possibility of finding the perfect cable tray depending on the needs and demands.

CABLE TRAY

FLEX

The perfect solution for the round table // If you are the owner of a round table, why see this as a limit? This flex cable tray is a perfect solution for round tables, since the cable tray can be shaped as the table. This means that the cable tray has two application opportunities: either by being curved or fixed. Either way, this cable tray is perfect for impoundment of cables and wires.

Cable tray - 147 cm. fixed

Height: 60 mm. // Width: 1470 mm. // Depth: 81 mm.

CABLE OUTLETS

SQUARED

Hide cables and wires discreetly // The tendency is that wires and cables take to much focus in the working environment due to the lack of hidden opportunities. This unwelcomed situation can, however, be solved with a cable outlet from PJ Production, where the wires and cables are hidden carefully in an elegant manner.

The manner in which the cable outlet is installed, is by making a size-costumed hole in the desktop where the cable outlet can be placed. These cables outlets have a squared shape – quadratic and rectangular, both with brushes in order to keep the cables and wires in place. PJ Production's assortment does likewise include round cable outlets, which can be found on the following page.

CABLE OUTLETS

ROUND

A cable outlet for your demands and needs // As mentioned previously, our cable outlet is available in a round design in numerous of materials. A black or white cable outlet in either ABS-plastic or steel look could be preferable if you are looking for a discreet look. A chrome cable outlet, on the other hand, could be a good choice if you are interested in a more risky statement.
The majority of all cable outlets come in Ø60 and Ø80 mm., respectively. When the choice, regarding color and size, has been made, the cable outlet can be installed in an accustomed hole in the desk in order to hide cables and wires.

Round cable outlets - Ø60, and a height on 13 mm.

MOBIL CASSETTE

An optimal solution for the portable office environment // The traditional offices are being challenged than ever before. This challenge consists mainly of smaller office environments combined with employees expecting more flexibility in the workplace. The collection has an innovative mobile cassette as a core product, which can easily be installed directly underneath the table or via mounting devices on the frame of the desks. The mobile cassette has two drawers, which can be used for writing instruments, hanging files, laptops, personal belongings, among other things.

The mobile cassette is ideal for future challenges with portable office environments, where each member of the staff can have their own personal drawer ready to be connected to an already installed cassette on the desks. An easy way of creating a flexible working environment.

MO-CUP

This multifunctional cup-holder has to be experienced // National and international companies embrace the smaller, portable offices, including the clean desk policy, where the workplace is empty and ready for the next-coming working day. PJ Production has developed a new and innovative cup-holder that discretely can be installed underneath the desk. The solution is ideal for smaller offices, since the cup-holder generates a depositary removed from the desktops. Furthermore, when removing the cup from the desk, the problem with damaged computers due to spilled liquid, - especially coffee, will be decreased.
The cup-holder is named: MO-CUP, because of the multifunctional design. Besides the space for a universal cup, the cup-holder has an integrated holder for a phone in the front. The phone can be charged while being placed in the cup-holder due to the hole in the bottom of the design.

SATCHEL HOOK

The perfect clean desk feature // The working environment is changing continuously, and the clean desk policy has never been more popular. Various of companies have chosen to integrate the policy as the customary in order to generate a more welcoming working environment with open-minded employees.
This satchel hook is attractive for the majority of all companies, especially those of whom that have integrated the clean desk policy, since the floor can be kept free from handbags that are flowing freely. The satchel hook is installed discretely underneath the desk to minimize the visibility when it is not being applied. Furthermore, the satchel hook can also be used to umbrellas or carrier bags to ensure that the floor is kept freely.

CABLE MANAGEMENT

80 CM., 120 CM., 160 CM. & 240 CM.

Easily and correctly storage of wires // Why be satisfied with wires and cables flowing along the edge of the desk, when these can be hidden and organized in an easy, simple, and correct way. The answer is a cable management sock from PJ Production. The cable management sock can easily be opened and closed without any tools, since the closing mechanism is a two-way zipper for total flexibility.

Additionally, the length of the cable management sock can easily be personalised due to Velcro, which can be used to extend the cable management sock with a shorter, longer, or similar cable management sock. Similarly, the diameter can be enlarged by connecting the chosen amount of cable management socks by using the zipper.

Currently, the cable management sock can be found in four different lengths in black. If you, however, are searching for a cable management sock in either light grey or white, do not hesitate to contact us to hear more about the possibilities.
